

Start Preparing Earth Day April 22

Let Westech Recyclers help you host an electronics recycling event and be part of the global activities to improve the environment.

Step
1

You decide the dates and fill in the [online event request form](#)

We'll confirm and reserve your dates and get the bins ready.

Step
2

You pick a collection location in your building or site

We'll provide collection bins and setup the bins. We can pickup full bins and drop more off during your event.

Step
3

You promote the event

We'll create your event flyer. We'll pickup the full bins at the end of the event and record your collected weight. We'll issue a Certificate of Recycling for the collected electronics.

Upon confirmation of your event, we'll send you a recycle bin for your pens.

We can tailor an event to your needs from a multi-day collection event at your site to a single-day drive-up event.
